

# Active Directory Reporting And Management

## Admindroid 365 License FAQ

## How AdminDroid's AD Licensing Works

AdminDroid 365 brings complete reporting, auditing, and management for Active Directory into a single console. This document covers Active Directory licensing in detail; for the licensing model shared across all products, see the AdminDroid Overall License document.

Licensing Active Directory takes just two steps:

### Step 1 - Choose your capabilities

Active Directory offers three capabilities:

- **Reports** (included by default)
- **Audit** (optional)
- **Management** (optional)

### Step 2 - Choose your plan

Pick the plan that matches how far you want your capabilities to go, from free essentials to complete end-to-end administration.

AdminDroid 365 offers a Free plan and three premium plans: Standard, Pro, and Pro Plus.

For a deeper look at how licensing works across all AdminDroid 365 products, including capabilities, plans, add-ons, and tokens, see the [AdminDroid 365 Overall License FAQ](#).

## Capabilities, Plans and Pricing

### What are the capabilities available for Active Directory?

AdminDroid offers the following capabilities for managing your Active Directory environment:

- **Reports** provides complete visibility across your domain through detailed reports and dashboards, along with flexible filtering, customization, export, and schedule features. Reports is included with every plan.
- **Audit** enables comprehensive tracking of activities and changes across your environment through audit trails, event logs, and historical reports, along with flexible filtering, customization, export, and schedule features. Audit can be added when you need to track changes.
- **Management** lets you perform actions such as create, modify, and delete across domain objects, using advanced tools like automation, approvals, alerts, reminders, and follow-ups. Management can be added when you need to act on your environment, not just report on it.

### What are the plans?

A plan sets how far your chosen capabilities go, from free essentials to complete end-to-end administration. AdminDroid 365 offers a Free plan and three premium plans:

- **Free** - A foundational level of Active Directory visibility and control, at no cost.
- **Standard** - All the essential features for everyday administration.
- **Pro** - Operational features for day-to-day administration, with more advanced capabilities.
- **Pro Plus** - Every feature, for complete end-to-end administration.

## How do I choose the right plan for my organization?

Both Reports and Management come with every plan, whereas Audit starts from the Standard plan. Higher tier plans simply go further - more detailed reports, more granular filtering, more advanced actions. Decide how deep you need each to go, then pick the plan that reaches that far. The comparison below shows exactly what each plan includes

| Detailed Comparison                         |  | Active Directory              |                            |                                                |                                          |                         |  |

## What visibility and analytics do I get with each plan?

AdminDroid provides 450+ reports and 10+ dashboards across your Active Directory environment, along with analytics and AI-driven insights. Each plan comes with its own set, ranging from essential reporting to advanced analytics. Open the **Reports & Dashboards** tab in the detailed comparison to see exactly what each plan includes, grouped by category.

## What actions and automation do I get with each plan?

With the Management capability, you can perform and automate day-to-day administration across your Active Directory environment, from managing users, groups, and computers to running workflows, approvals, alerts, and reminders. Each plan includes its own set, ranging from essential actions to advanced automation. Open the **Management & Automation** tab in the detailed comparison to see exactly what each plan includes, grouped by module.

**Note:** Management and Automation require the Management capability in your license.

## How is the pricing for the AdminDroid Active Directory license calculated?

Pricing is based on the total number of enabled users in your Active Directory domain.

By default, the report pack is free; you get the free reports included with your chosen plan. However, if you add the Audit or Management capability, pricing is based on the number of enabled users in your Active Directory domain.

## Add-Ons

### What add-ons are available in AdminDroid 365 for your AD environment?

AdminDroid offers the following add-ons for your AD reporting and management:

- **AD Domain add-on** — extends your license to cover additional Active Directory domains within the same AdminDroid portal.
- **Domain Controller add-on** — extends auditing to additional domain controllers.
- **Windows Server add-on** — extends auditing to additional Windows servers.
- **AD Workstation add-on** — extends auditing to additional workstations.

### How do I purchase AD add-ons?

Select the add-ons you need in the Add-ons section of your cart when you purchase your AdminDroid 365 subscription — or add them later by upgrading your license. Either way, your payment is credited as a token balance which stays flexible: spend it on any eligible add-on in the AdminDroid portal once your license is active.

### What's included when I purchase the Audit capability?

By purchasing the Audit capability, you receive the Audit starter pack by default, with complimentary access to 3 endpoints (1 Domain Controller, 1 Windows Server, and 1 Workstation). You also get 200+ audit reports and 20+ audit dashboard widgets, which show data from these starter pack endpoints.

### How do I extend auditing to more endpoints?

To audit more, add the required endpoints under the Domain Controller, Windows Server, or Workstation add-ons, and they'll start showing in your audit reports. These add-ons require the Audit capability, so it must be enabled in your purchased plan.

### Can I use the endpoint add-ons without the Audit capability?

No. The Domain Controller, Windows Server, and Workstation add-ons require the Audit capability. It must be enabled in your plan before you can add or use these endpoints.

For the licensing model shared across all products, see the [AdminDroid Overall License document](#).

Our mission is to solve everyday challenges of IT admins and save their time. We strive to provide admin-friendly software with a user-friendly interface, at a budget-friendly pricing. Try AdminDroid, and you'll love how it simplifies your Microsoft 365 and Active Directory management!
